1. Claims 30-47 are allowable over the prior art of record.
2. Claims 1-29 and 48-49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

On lines 5-7 of independent claim 1, it is unclear what is modified by the phrase "as a function of image collection time." It seems to modify "identification" (line 6), but that does not make logical sense.

On line 3 of independent claim 48, it is unclear in context what action is meant by the verb "characterizing" and how that action obtains a "scatterer."

On line 6 of claim 48, it is unclear in context what action is meant by "enhancing." Further, it is unclear in context what is meant by "enhancing information based on the signature."

Dependent claims 2-29 and 49 are unclear in that they depend from unclear independent claims 1 and 48.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art is of interest for showing SAR systems and methods that use signatures as in Applicants' invention. Please especially note Petty (US 6,333,986 B1).
